Charleston and Jersey Wakefield

71 days. Desirable for home and market garden. Head broad heart-shaped, 8 inches broad at base, firm, commonly weighing 4 to 5 pounds. Fully a week later; heads larger and broader heart-shaped than Early Jersey Wakefield.

COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as Jersey Wakefield. The stem is short, and the large, round, solid head has few outer leaves. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing 3 to 3½ pounds, produces headed Cabbage 70 days after plants are set out.

FERRY'S ROUND DUTCH

71 days. Splendid for home and market garden. Plants small and compact; stem short. Heads almost ball-shaped, commonly 7 to 8 inches in diameter and 6 inches deep, weighing 4½ to 5 pounds. Firm and of high quality. Slow to produce "seeders."

FULWOOD'S

Frost-Proof

CABBAGE PLANTS

Guaranteed to be reasonably free of aphids and diseases

Ready September 1 to June 15

Anyone wishing to contract for Cabbage or Tomato Plants in lots of half million or more from our Tifton Georgia Farm and be assured of getting your plants at a particular time, write us for special prices.

CULTURE — CABBAGE, COLLARD AND BROCCOLI PLANTS

These are frost-proof plants and should stand a temperature of 20 degrees or below. Requires about ten thousand plants to plant one acre and use from one to two thousand pounds of 4-8-6 fertilizer to an acre. Plant in 3 ft. rows, from fourteen to twenty-four inches in the drill. They should be planted up to the bud, but do not cover the bud. Water and press the soil firmly around the plants. Use Sabadilla dust for control of Harlequin bugs. Use five per cent DDT Dust for all types of Cabbage worms.

Please send all orders to P. D. Fulwood Company, Tifton, Georgia

FULWOOD'S Frost-Proof CABBAGE PLANTS

Guaranteed to be reasonably free of aphids and diseases.

Ready September 1 to June 15

GOLDEN ACRE

62 to 64 days. The earliest round-headed Cabbage; especially valuable for early market and shipping. Plants very small and compact; stem short; heads uniformly round, firm, commonly 6 inches in diameter and weighing 3 pounds. This is similar to Copenhagen Market but is several days earlier and the heads are smaller. It is practically as early as Early Jersey Wakefield.

GLORY OF ENKHUIZEN

80 days. Attractive, round, solid heads, 7 to 8 in. in diameter, and weighing from 5 to 6 lbs. each. They are exceptionally firm and solid. Leaves are finely ribbed, exceedingly tender and of remarkably fine flavor. Makes excellent kraut, slaw, etc.

Please send all orders to P. D. Fulwood Company,
Tifton, Georgia

GEORGIA BLUE STEM COLLARD PLANTS

These are very much like Cabbage plants. They grow from 2 to 3 feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

Collards can be planted in fall and spring. Not in winter as they go to seed.

MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important midseason yellows-resistant variety for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Matures heads 70 days after plants are set out. Somewhat larger head than Copenhagen, but the same shape.

WISCONSIN ALL-SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities, and it is well adapted for kraut and for winter use. Makes heads in 85 days, weighing 6 to 8 pounds.

Approximately one thousand Cabbage Plants ready for shipment.

FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

Ready September 1 to June 1

Southern-grown Onion plants are no longer an experiment. Large quantities are set out every year and they are rapidly displacing sets. They will grow large, sweet Onions early, and are good keepers. They produce Onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore, we strongly advise you to use our plants instead of sets, whether for the market or home use. Our Onion plants are grown from the very best seed, and will be found true to name. These Onion plants should be set out at the same time as cabbage plants, and you can order them for shipment at the same time.

Most Onion plant growers pull Onion plants ahead and store them several weeks before shipping. Such plants cannot produce good crops. Our plants are fresh pulled and shipped the same day and produce better crops.

*Crate of Onion Plants
ready for shipment.*

CRYSTAL WAX BERMUDA

Probably the best-selling Bermuda Onion on the market, because of its exceptionally attractive appearance. It looks much like the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

SWEET SPANISH

The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber-orange; small neck; globular.

YELLOW BERMUDA

This is the most widely planted of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market. It is a large producer and a real money-maker. Whether grown for marketing or for your own table, you can make no mistake in ordering this variety.

PRICES

Onion Plants are tied 100 to a bunch. Shipping weight is 7 lbs. to the 1,000 plants.

CULTURE—ONION PLANTS

These are frost-proof and can stand temperature below twenty degrees. Plant approximately sixty thousand plants to an acre in 1½ ft. rows, three to four inches in the drill and about two inches deep. Water and press soil tightly around plants. Dust with 5% DDT for thrips.

Turn to page 14 for your dust and duster needs.

CULTURE—CAULI- FLOWER PLANTS

These are frost-proof and can stand temperature of twenty degrees. Plant approximately ten thousand plants per acre and be sure to plant so they will head in cool weather as they will not head properly in hot weather. Plant in 3 ft. rows, eighteen inches in drill. Dust same as for Cabbage Plants.

FULWOOD'S BEET PLANTS

Ready January 1st

Crosby's Early Egyptian. This is probably the most popular Beet grown. I specialize in this one variety because it is the finest all-round home-garden and market Beet, and can be grown in all localities successfully. Have an extra-early crop by ordering these plants.

CULTURE – BEET PLANTS

Frost-proof and will stand a temperature of twenty degrees or below. Plant in 3 ft. rows about six inches apart and use approximately thirty thousand plants to an acre. Beets are easy to grow and are not seriously affected by insects or diseases.

Parcel Post Prepaid To Your Door	EXPRESS – COLLECT

FULWOOD'S LETTUCE PLANTS

Ready January 1st

Imperial 847. Large, compact, uniform and attractive. Stands heat and will not run to seed like other varieties.

CULTURE – LETTUCE PLANTS

Will stand twenty degrees. Makes head in approximately 65 to 70 days. Use very rich soil and plant in 2 ft. rows, 12 inches apart. Takes about twenty thousand plants to plant an acre. Should put a light application of nitrate of soda after the plants have reached some size. Has no insects or diseases.

California Wonder Sweet Pepper Plants

CALIFORNIA WONDER (Sweet) PEPPER

This is an outstanding medium large variety for market garden and shipping. Plants vigorous and prolific. Fruits four-lobed, chunky, very attractive, smooth, uniform deep green, changing to bright crimson. Flesh thicker than any other variety, sweet and mild. Our stock is definitely superior.

Not Frost-Proof. Ready April 1 to June 15

Please send all orders to P. D. Fulwood Company, Tifton, Georgia

CAYENNE PEPPER

Long Red Cayenne Variety—A favorite hot variety used largely for canning, and in pickles; also for drying. Plants large and productive. Fruits tapering, frequently twisted; very pungent; deep green changing to brilliant red.

Parcel Post Prepaid To Your Door		EXPRESS — COLLECT

CULTURE — PEPPER PLANTS. Will not stand frost. Should be planted in 3 ft. rows, twenty-four inches apart. Use approximately seven thousand plants to an acre. Pepper, as a rule, are not bothered seriously by insects or diseases.

See page 14 for dust and dusters.

Telephone—Day 293, Night 678-J

Long Red Cayenne Variety

EGGPLANT PLANTS

NOT FROST-PROOF

Black Beauty. I specialize in this one variety because it has many merits. It holds its color well, grows very large, has good shape and is of unusually good quality. The Black Beauty variety is naturally early, and if you will grow it from my fine plants your crop will be just that much earlier.

Ready April 1 to June 15

CULTURE — EGGPLANT PLANTS

Will not stand any frost. Should be planted in 3 ft. rows, twenty-four inches in the drill. Requires approximately seven thousand plants to plant one acre. Dust about once a week with Fulwood's Tomato Dust to keep the potato bugs off.

DO NOT DESTROY YOUR CATALOG ENVELOPE. SPECIAL OFFERS FOR SMALL GARDENERS

FULWOOD'S IMPROVED BUNCH PORTO RICO SEED SWEET POTATOES AND PORTO RICO SWEET POTATO PLANTS

BUNCH PORTO RICO SWEET POTATO SEED

Ready Jan. 1st to May 1st

Carolyn and Celeste Fulwood inspecting a bushel of Bunch Porto Rico Sweet Potato Seed.

If you prefer to bed your own potatoes and grow your own plants we can furnish you the Seed Potatoes at \$5.00 per bushel, F. O. B. Tifton by Express or Freight. These Seed Potatoes are shipped in bushel crates and shipment can be made at any time up to April 1st. After that time we will bed all seeds not sold. We highly recommend that you plant some of these Bunch Porto Rico Sweet Potatoes.

INSTRUCTIONS FOR BEDDING FULWOOD'S IMPROVED BUNCH PORTO RICO SWEET POTATOES

One bushel of potatoes should pull one thousand plants each pulling for about three consecutive pullings. Choose a well drained piece of soil on the south side of a building where the sun can hit it all day. Mix approximately three pounds of commercial fertilizer to each square yard of dirt. Place the potatoes far enough apart that they do not touch and cover them with some three to four inches of soil. Keep them moist but not too wet as excessive water makes them cold. You should get your first pulling in approximately six weeks, depending on the weather.

If you desire to make a hot bed for extra early plants write the Georgia Agricultural Extension Service, University of Georgia at Athens, Georgia, for bulletin No. 533.

HUDSON ADMIRAL

Price
Delivered
\$1.50

We suggest this Duster for gardens that have 5,000 or more plants. Made of heavy tin. Pump 2¾ inches diameter, 9½-inch stroke. Powder reservoir 2¾ x 4½ inches. Large filler screw cap permits easy filling, emptying or cleaning. 24-inch extension tube with nozzle instantly adjustable for straight or angle discharge.

Mr. John Sproull, Pathologist and Manager of Palatka Florida Farm, inspecting a field of Golden Acre Cabbage Plants.

We grow Tomato Plants and Cabbage Plants at our Palatka Florida Farm in order to give our customers a longer shipping period than we could if we grew all of our plants at the Georgia Farm. Our first Tomato Plants in March through April 15th are shipped from this farm and after that time we ship from the Tifton Georgia Farm.

We plant Copenhagen Market and Golden Acre Cabbage seed at Palatka, Florida, in January and have them ready for shipment in February and March. After that time we have Spring grown Copenhagen Market and Golden Acre Cabbage Plants at our Tifton Georgia Farm.

All of our Palatka Florida Farm can be irrigated. This farm is situated on the south side of the St. Johns River where the climate is very temperate. However, we have enough frost on our Copenhagen Market and Golden Acre Cabbage Plants grown on this farm to make them reasonably frost-proof, although, they will not stand as much cold as other varieties.

Anyone wishing to contract for Cabbage or Tomato Plants in lots of half million or more from our Palatka Florida Farm and be assured of getting your plants at a particular time, write us for special prices.

SEND ALL ORDERS TO TIFTON, GEORGIA, AND THEY WILL RECEIVE OUR PROMPT ATTENTION.

PLANTING NOTES: When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart for proper spacing.

40 YEARS OF SATISFACTORY SERVICE

I guarantee all of my plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled approximately 50 to bundle and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify me within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

I send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall I be responsible for any amount beyond the purchase price.

FULWOOD'S

CERTIFIED

TOMATO PLANTS

READY APRIL 1 TO JUNE 15

My Tomato plants, grown on new land from Certified seed, are certified by the State of Georgia. I grow each season four hundred acres of Tomato plants. They are grown in the open field and when shipped are 8 to 10 inches tall; they are field hardened, stocky, and well rooted. Each bundle of 100 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express, and will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over.

The fact that the seed is planted here in February and March gives the plants a chance to become acclimated and toughened by outside temperatures. When set farther North they will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home-grown or hothouse plants. I ship these plants to every part of the United States, and have been shipping large quantities to market gardeners and truckers for 40 years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of my Tomato plants every season. Send me your order for some of these fine plants. You will be more than pleased with the early profitable crop they will produce.

GREATER BALTIMORE

is similar to Stone, heavily productive and very valuable for canning. The large, scarlet-red fruits commonly weigh 6 ounces; they are deep but flat, smooth, very firm and solid.

MARGLOBE

is a splendid type for earliness and uniformity. It is particularly valuable for shipping; definite disease-resistance recommends it for use in sections infested with fusarium wilt and nail-head rust. Plants thrifty and heavily productive bearing over a long period. Fruits uniform deep scarlet, large, globe shaped; smooth, solid and of distinct quality.

RUTGERS

is highly recommended as a second-early variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

PRITCHARD (SCARLET TOPPER)

is a very promising, heavily productive wilt-resistant variety for home and market garden, shipping and canning. Fruit large, globe shaped, scarlet and well colored about the stem end; flesh firm and of fine quality.

Hamper containing 400 Georgia Certified Tomato Plants ready to be shipped

CULTURE — TOMATO PLANTS. Will not stand any frost. Should be planted in 4 foot rows, thirty-six inches apart and use about 3,500 plants to an acre. They should be planted up to the first heavy stem or leaf. For tomato bugs, fungus and bacterial diseases use 7% Metallic Tri-basic Copper Sulphate with 20% Calcium Arsenate dust and use about fifteen to twenty pounds per acre.

Anyone wishing to contract for Cabbage or Tomato Plants in lots of half million or more and be assured of getting your plants at a particular time, write us at our Tifton Georgia farm for special prices.
